Re: Reference for Gas Track Engineering Ltd.

To whom it may concern,

Jason Paziuk, founder of Gas Track Engineering, has been providing Glenogle Energy Inc. services since 2008. Through all of Jason's former companies; Vision Geomatics, Focus Surveys and then WSP we have maintained our relationship. We are still continuing the relationship with Jason and have utilized the services of Gas Track Engineering for land surveying and our Fugitive Emission/Methane Reduction Management Program. We trust his work, his expertise and that of his team, and appreciate the service he has provided Glenogle.

Recent projects include:

4-11-74-13-w6 pipeline r/w as built, 2020

14-17-82-13-w6 wellsite survey, 2019/20

Fugitive Emissions Management Program support, 2019/2020

Methane Reduction Component inventory collection support, Sinclair, Doe East and West fields, 2019/2020

Previous to 2019 there have been many (to many to list) access roads, wellsites, pipeline right of ways surveyed/coordinated by Jason on both private and crown land.

Jason has always provided a cost effective service, on time, on budget and of high quality.

Sincerely,

Dave Gammie

Dave Gammie. P.Eng.

VP, Engineering and Production.
